

Objective: Computer Science and Engineering graduate with hands-on experience in application support, troubleshooting, SQL databases, Linux environments, and enterprise platforms. Skilled in incident management, issue resolution, system monitoring, and collaborating with cross-functional teams to deliver reliable technical support. Strong understanding of software applications, customer support processes, and production environments with the ability to quickly learn and troubleshoot technical issues. Seeking an Application Support Engineer or Technical Support role to contribute strong analytical and problem-solving skills.

Technical Skills

Programming & Scripting Languages: Java, Python, C, C++, JavaScript, PHP

Computer Science Fundamentals: Data Structures, Algorithms, Object-Oriented Design, Complexity Analysis, Problem-Solving & Logical Reasoning, System Design & Architecture, Computer Networks, Operating System

Application Support: Incident Management, Problem Resolution, Root Cause Analysis, Technical Troubleshooting, Application Monitoring, Ticket Management, SLA Awareness

Databases: SQL, MySQL, DBMS, Relational Databases, Query Optimization

Monitoring & Reporting: System Monitoring, Performance Analysis, Log Analysis, Reporting, Data Validation

Methodologies: Agile/Scrum, SDLC, Code Reviews, Unit Testing, Regression Testing, Debugging, Troubleshooting, Feature Enhancements

Professional Skills: communication skills, Team collaboration, Analytical Thinking, Adaptability, Initiative

Tools & other skills: Unix/Linux, Windows, GitHub, Tableau, ServiceNow, Salesforce, VS Code

Work Experience

SALESFORCE, *Virtual Intern*

July 2025 – Sep 2025

Salesforce Developer

- Completed the Salesforce Agentblazer Virtual Internship, gaining hands-on experience in Salesforce CRM concepts including data management, automation, and application configuration.
- Worked with Salesforce Lightning Platform tools such as Objects, Fields, Reports, and Dashboards to understand how organizations manage customer data and business workflows.
- Explored Salesforce automation features like Flow Builder and Process Automation to streamline business processes and improve operational efficiency within CRM systems.

EduSkills, *Remote*

Oct 2024 – Dec 2024

Java Full-Stack Developer Intern

- Designed and developed software components within an existing multi-tier architecture, adhering to defined design specifications and backend enhancements using Java, Spring Boot, React.js, and MySQL.
- Implemented backend logic, database queries, and validations, improving data consistency, performance, and fault handling.
- Performed unit testing, minor debugging, troubleshooting and REST APIs integration activities, ensuring features were delivered on schedule and met functional requirements.
- Collaborated with peers to deliver an end-to-end solution, improving inventory visibility by 90%.

Projects

Supermarket Billing and Inventory Management System

- Implemented a Web-based billing system using HTML, CSS, JavaScript and PHP, developing modules for product and customer management, billing, transactions, discounts, and tax generation, with a secure admin authentication system.
- Integrated an SQL database to manage product inventory, transaction records, customer membership details and reward points, as well as employee and admin credentials, enabling secure data management and efficient store operations.
- Applied Machine Learning techniques to analyze historical sales data and predict future product demand.
- Created interactive dashboards using Tableau to visualize sales trends, stock levels, and revenue insights.

Real-Time Pothole Detection System

- Developed a pothole detection system using YOLOv8 object detection and segmentation, enabling automatic identification of road potholes from images and video streams.
- Trained the model on a custom pothole dataset using Roboflow for data annotation and preprocessing, improving the accuracy by 95%+ of pothole detection.
- Implemented detection & tracking in video streams using python and Google Collab GPU utilizing the YOLOv8 framework.

Education

Bachelor of Technology, Computer Science and Engineering (AI & ML)

July 2022 - May 2026

Mohan Babu University, Tirupati

Percentage: 83.8%

Certifications

ServiceNow Certified System Administrator – 27179596

ServiceNow Certified Application Developer - 523752884

Achievements

- Winner of Lumen Quest 2026 Hackathon, securing 1st place among 200+ teams.
- Served as a School People Leader, contributing to student coordinator and leadership activities.
- Awarded Best Team Coordinator in NSS and featured in a newspaper for providing outstanding community service.

Research Methodologies

- Brain Stroke Disease Prediction Using SMOTE & Cost-Sensitive Learning for Imbalanced Clinical Data – [Paper Link](#)
